

**Becky Swerida** is the Reserve Biologist with Maryland's Chesapeake Bay National Estuarine Research Reserve. There she developed and currently manages the Resiliency through Restoration shoreline monitoring program and the submerged aquatic vegetation (SAV) program, in addition to assisting with many other Research and Stewardship sector efforts. Previously, Becky has worked with Maryland DNR's Shoreline Conservation Service, offering technical assistance to shoreline property owners and managing living shoreline projects. She specialized in SAV restoration during her graduate work at the Horn Point Laboratory.
