

Scholarly activity under the following separate headings with full bibliographic data:

- a) refereed publications in periodicals, chapters in books, law review articles and conference proceedings

- Ha, H.K., W.-Y. Hsu, J. P.-Y. Maa and Y.Y. Shao, Using ADV Acoustic Backscatter Strength for Measuring Suspended Cohesive Sediment Concentrations. Submitted to *Marine Geology*, accepted.
- Maa, J. P.-Y., J.-I. Kwon and K.-N. Hwang, H.K. Ha, 2008. Critical bed shear stress for cohesive sediment deposition under steady flows. *Journal of Hydraulic Engineering*, 134(12), 1767-1771.
- Maa, J. P.-Y., 2008. Sediment erosion characteristics in the Anacostia River. *Journal of Hydraulic Engineering*, 134(8), 1102-1109.
- Maa, J. P.-Y. and J.-I. Kwon, 2007. Using ADV for Cohesive Sediment Settling Velocity Measurements. *Estuarine, Coastal and Shelf Science*. 73, 351-354.
- Maa, J. P.-Y. and B. Chadwick, 2005. Estimation of annual averaged propeller erosion rate in San Diego Bay, California. In: *Coastal and Estuarine Fine Sediment Processes*, J.P.-Y. Maa, L.P Sanford, and D.H. Schoellhammer (Eds.), Elsevier, Amsterdam, 125-141.
- Kwon, J.I., J. P.-Y. Maa and D.-Y. Lee, 2005. A preliminary implication of the constant erosion rate model for simulating turbidity maximum in the York River, Virginia, USA. In: *Coastal and Estuarine Fine Sediment Processes*, J.P.-Y. Maa, L.P Sanford, and D.H. Schoellhammer (Eds.), Elsevier, Amsterdam, 321-344.
- Maa, J. P.-Y., C.H. Hobbs, S.C. Kim, and E. Wei, 2004. Potential impact of sand mining offshore of Maryland and Delaware: Part 1- impact on physical oceanographic processes. *Journal of Coastal Research*, 20(1), 44-60.
- Maa, J. P.-Y. and S.-C. Kim, 2002. A constant erosion rate model for fine sediment in the York River, Virginia. *Environmental Fluid Mechanics*, 1, 343-360.
- Maa, J. P.-Y. and D.-Y. Lee, 2002. A preliminary study on the measurement of high resolution marine sediment bed structure. In *Fine Sediment Dynamics in the Marine Environment*, Eds. J.C. Winterwerp and C. Kranenburg, Elsevier, 469-482.
- Maa, J. P.-Y., T.-W. Hsu and D.-Y. Lee, 2002. The RIDE model: an enhanced computer program for wave transformation. *Ocean Engineering*, 29 (11), 1441-1458.
- Sanford L.P., and J. P.-Y. Maa, 2001. Toward a unified erosion formulation for fine sediments. *Marine Geology*, 179, 9-23.
- Maa, J. P.-Y., 2001. Discussion on the article "A numerical modeling of flow characteristics in a rotating annular flume," by Yang, Z., A. Baptista, and J. Darland, 2000, *Dynamics of Atmospheres and Oceans*. 33, 321-323.
- Maa, J. P.-Y., K.-J. Sun, 2001. Discussion on "Acoustic profiling of fine suspension concentration in the Changjiang Estuary," By Z. Shi, L.F., Ren and L.J. Hamilton, 1999, *Estuaries*, 22(3a), 648-656. *Estuaries*, 24(1), 135-137.
- Maa, J. P.-Y., C. H. Hobbs, III, and C. S. Hardaway Jr., 2001. A criterion for determining the impact on shorelines caused by altering wave transformation. *J. Coastal Research*, 17(1), 107-113.
- Hobbs, C.H., III and J. P.-Y. Maa, 2000. Reply to Smith, A.W.S., 1999, *Journal of*

- Coastal Research*, 15(4), 1178. Discussion of Maa, J.P.-Y. And Hobbs, C.H. III, 1998, Physical impact of waves on adjacent coasts resulting from dredging at Sandbridge Shoal, Virginia, *J. of Coastal Research*, 14(2), 525-536.
- Kim, S.C., C. Friedrichs, J. P.-Y. Maa, and L.D. Wright, 2000. Estimating bottom stress in a tidal boundary layer from acoustic Doppler velocimeter data. *J. of Hydraulic Engineering*, 126(6), 399-406.
- Maa, J. P.-Y., T.-W. Hsu, C.-H. Tsai, and W. J. Juang, 2000. Comparison of wave refraction and diffraction models. *J. of Coastal Research*, 16(4), 1073-1082 .
- Maa, J.P.-Y., L. Sanford and J.P. Halka, 1998. Sediment resuspension characteristics in the Baltimore Harbor. *Marine Geology*, 146, 147-145.
- Maa, J.P.-Y. and C.H. Hobbs, III, 1998. Physical impact of waves on adjacent coasts resulting from dredging at Sandbridge Shoal, VA. *J. of Coastal Research*, 14(2), 525-536.
